Seeking Permission to plant a fruit tree [Appendix One] (One Page)

Before you plant a tree on your plot, please ensure you meet the requirements of the current AAS Byelaws, complete the following form and submit it for formal approval by the AAS committee. Planting without permission may result in you being asked to remove the tree:

Plot holder name and plot number	
Type of fruit tree? Please note ONLY fruit trees can be planted	
Variety of fruit?	
Root stock Trees must be on dwarf root stock i.e. M26 or smaller for apples, Quince C for pears and quince, pixy for plums, damsons and gages Gisela 5 for cherries.	
Tree habit/shape Trees managed as Cordon or Stepover offer less shade to your plot and allow more trees to be planted on a plot. However, they must be managed to retain shape.	
Position on your plot Trees must be planted 1.5m from any edges of your plot and must not interfere with your neighbours or paths. Please roughly sketch (it does not need to be to scale) the position you would like to plant your tree indicating any other trees, shed, greenhouse already on your plot with measurements in this box	

I agree to keep all trees on my plot less than 2.1M (7ft) high, and ensure none cause obstruction or cause hazards to others. I will ensure the tree is maintained / pruned to the agreed shape, ensure plant health and remove any diseased wood from site
