

Mick is known as “The Doctor” as he can sort all your panes (for your greenhouse).

He is the guy responsible for maintaining the site so it is a safe place to work and visit.

He is here, early, most mornings doing an inspection of the site but if you do see something needing attention let him know. “See it, say it and Mick’ll sort it” - after all he did work on the railway for years.

He’s never happier than when he sits astride the ride on mower, keeping the paths like a bowling green.

It’s a toss up between him, Kevin and Sam as to who drinks the most tea.

His cabbages are not just big they’re mahoosive. People speculate that his plot is radioactive and they’re mutants but it’s never been proven.

Aside from Cabbages, Mick’s passion is Tomatoes. If he was only allowed to grow one thing, it would be his toms!
